Product Description

Rejeunesse Deep Hyaluronic Acid Dermal Filler With Lidocain Korea

Non-animal hyaluronic acid & no residual crosslinker.

Rejeunesse is non-animal based, cross linked dermal filler using BDDE for linking agent.

Rejeunesse product is obtained through our unique BDDE removal process, making it safe and non carcinogenic for humans. Rejeunesse contains less than 1.2EU/ml of endotoxins with no BDDE residue detected and it exceeds the highest level of HA purity.

Rejeunesse is completely free of all animal products thus reducing the risk of an immunogenic reaction.

-LONG-LASTING.

Immediately visible results after application.

Once injected, HA is gradually broken and absorbed into the body, which is how strongly HA is crosslinked is crucial to the longevity of the dermal fillers. With unique cross-linking technology, Rejeunesse has longevity over 12 months.

-EFFICACY.

More stable forms of HA, in particular by 100% cross-linked HA molecules.

Rejeunesse offers visible results immediately and stable volume effect with minimized swelling after application.

-TREATMENT WITHOUT PAIN

Rejeunesse has optimized the product to minimize the pain during and/or post injection for the patients. Rejeunesse enables smoothest and stable injection during procedure by maintaining consistent injection force. Especially, Rejeunesse Lidocain series which combines 0.3% of lidocaine (Local anesthetic) minimizes injection pain during the procedure. Thus, it allows patients to experience the most comfortable, almost painless, procedure of dermal fillers.

Rejeunesse FINE	with lidocaine (24mg/ml, 1.1ml) This is used in the correction of fine to medium size depression of the face via mid to superficial dermis injection.
Rejeunesse DEEP	with lidocaine (24mg/ml, 1.1ml) This is used in the correction of medium to deep sized depression of the face via mid to deep dermis injection
Rejeunesse SHAPE	with lidocaine (24mg/ml, 1.1ml) This is used in the correction of deep sized depression of the face via deep dermis to subcutaneous injection
