size	1 piece per box
effection	dermal filler
how to use	injection
usage	lips cheek facial nose filler
usages	dermal filler injection
MOQ	1 piece
eccects	Anti aging wrinkles

### PRODUCT DETAILS

#### Product Description

Radiesse 1ml Dermal Filler Injectable Collagen Remove Wrinkles Facials

Radiesse 3ml reshapes and fills the face. Radiesse consists of micro implants made of CaHA or hydroxyapatite microspheres, and works effectively in biodegradable liquid gel.

#### benefit

Improve the symmetry and protrusion of the lower jaw and chin to improve their surrounding area.

Beautify your face: correct bitter wrinkles, deep wrinkles, nasolabial folds, and lip corners..

Reduce irregular and bulging nose.

Restore the volume of the hollow cheeks.

#### What Is Radiesse?

As we age, our body produces less collagen. In fact, after age 20, our body produces 1% less collagen every year. At the same time, we lose the ability to retain moisture and elastin production decreases.

As a result, fine lines and wrinkles begin to form. Skin also begins to sag as it loses water and elasticity.

Radiesse is a minimally invasive cosmetic skin procedure. It involves injecting filler into specific areas of the face.

Typically used in the lower and mid-section of the face, Radiesse gives your skin volume again – and it does so without looking like you've had a procedure done.

Radiesse is particularly useful in the mid & lower face areas. It can also be used on hands that have visible signs of aging.

#### Who Is A Candidate For Radiesse?

The safe and easy treatment can help with creases in the corner of the mouth

h, the volume of your cheeks, and sagging jaw lines. It can reduce the appearance of jowls, strengthen weak chins, and fix nasolabial folds.

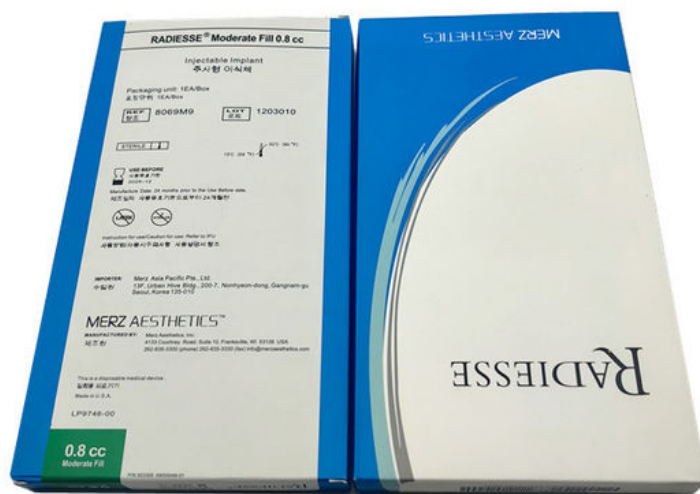

Radiesse is also a treatment option for people with aged skin on the back of their hands.

### What Is A Radiesse Procedure Like?

The first step in a Radiesse procedure is your consultation. There, our medical provider will inform you of where the injections will go and what the dosage will be. They'll inform you of any risks and prepare you for the treatment.

As with any procedure involving a needle, you may feel some discomfort or slight pain. But this 30-minute treatment is so quick and simple that you can head back work, home, or school after your appointment.

## Description

1ml with s an efficient dermal filler for correcting moderate to severe lines and wrinkles as well as plumping and shaping your patient's lips. Product is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin with the addition of 0.3% hydrochloride. 1ml with is supplied in a glass syringe with a Luer lock fitting. Only authorized aesthetic professional in accordance with local regulations should administer with injections.

### The packaging content:

- 1 prefilled syringe 1,0 ml
- 2 x needles
- Traceability labels

version is suitable for improvement for fine lines, rinkles and folds. It is highly recommended to use for lips enhancement. The brand is made using patented Non-Animal Stabilized Hyaluronic Acid (NASHA) Technology, which helps retain the natural way that hyaluronic acid molecules connect to each other. This results in a product that produces much longer-lasting results. As well, this filler comes with added , an anesthetic for better patient experience during injection.
