effect	loss fat dissolving weight slimming
usage	for beauty clinic spa
size	8ml x 10 bottles /box
type	injection for loss fat
usage	facial breast buttocks body arm loss fat
feature	loss fat loss weight dissolving

#### What is the Lemon bottle

the "lemon bottle" fat-dissolving injection has become popular as a fashionable remedy to the fat problem. This procedure involves directly injecting a solution into some areas of the body to melt the stored fat; the molten fat is naturally released from the body. However, as with most aesthetic treatments, there are always incipient dangers and possible detrimental consequences. In this blog, you will learn about the Lemon bottle fat-dissolving process, lemon bottle fat dissolver side effects, how it compares to other fat reduction techniques and post-treatment care for lemon bottle fat dissolving.

#### kabelline solution

As expected, though, lemon bottle fat dissolving comes with specific corollary challenges. Patients will likely develop localized edema, erythema, and hematoma formation at the injection site. These are generally slight and last for a few days only. However, severe consequences can be experienced, such as infection or even if the fat is deposited unevenly. The lemon bottle fat dissolver risks can be mitigated if an able practitioner is carefully selected. A health professional should be consulted about what can be anticipated in terms of possible adverse effects of the lemon bottle fat dissolving.

#### Used For?

Saggy/ Double Chin  
Fat pouches at the corner of the mouth  
For general V-line face  
Abdominal region  
Upper arms  
Waist  
Hips  
Augmented fat depots located on buttocks  
Inner and outer thighs

#### How to use

When applying to the face it is recommended to use 2ml of solution.  
When injecting in the body 4-8ml of the solution is recommended.  
Maximum amount of dosage- 16ml per session.  
Repeat the treatment 3-6 times within 1-week interval for best results.  
Always make sure to shake the vials before applying.
