LED Facial Light Infrared LED Therapy PDT LED Professionele Machine Bio Photomodulation LED Phototherapy Light

Our Product Introduction

Basic Information

- Place of Origin: china
- Brand Name: LED Light Therapy
- Certification: ce
- Model Number: m8
- Minimum Order Quantity: 1
- Price: 3000
- Packaging Details: one pen two needle
- Delivery Time: 3-5day
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000

Product Specification

- Highlight: Professionele Machine LED Therapy PDT LED, Photomodulation LED Therapy PDT LED

Product Description

LED Facial Light Infrared LED Therapy PDT LED Professionele Machine Bio Photomodulation LED Phototherapy Light

Model	LP100S
Diode Quantity	3000
Power	800W
Diode Power	100mw/diode
Wavelength	400-700nm
LED Colors	Red Blue Yellow Orange Cyan Purple White
Screen	8inch touch screen
working mode	Pulse mode/ Continue Mode

LED Facial Light Infrared LED Therapy PDT LED Professionele Machine Bio Photomodulation LED Phototherapy Light

Principle of Treatment

LED Therapy is the therapeutic use of light to modulate cellular function to improve and quicken wound healing, treat acne, rejuvenate the appearance of skin, stimulate hair growth, improve local circulation, perform 5-ALA photodynamic therapy (PDT), and relieve pain and stiffness in muscles and joints.

The light is placed over the skin with no contact and is illuminated for a period of 15-30 minutes. This allows absorption of photons (light particles) into the target cellular components, resulting in the production of new cellular energy. The response of the inflammatory-stage cells is enhanced, and small proteins are released which support the growth, survival and differentiation of new cells.

LED Facial Light Infrared LED Therapy PDT LED Professionele Machine Bio Photomodulation LED Phototherapy Light

A combination of red and blue light creates purple light, which helps eliminate toxins, reduces inflammation and improves healing and circulation of blood.

Reduces sebaceous activity and acne vulgaris. Works to clear congestion and kills acne-causing bacteria.

Calms and soothes irritated skin. Supports in reducing the size of swollen capillaries.

Stimulates collagen production and assists wound repair to naturally heal and regenerate skin from within. Beneficial for rosacea and post-laser treatments.

Promotes a brighter glow for more radiant skin. Adds vitality to dull, lifeless complexions.

Accelerate active tissue metabolism, reduce fine lines and sagging skin.

Increases blood circulation and lymphatic flow to encourage cellular renewal and promote a youthful complexion.

LED light therapy benefits include

- + Repair and rejuvenate skin
- + Increases blood flow to tissue
- + Stimulates collagen production
- + Relief of muscle and joint pain/pain management
- + Improve skin tone and texture
- + Decreases the risk of bruising
- + Treat acne, dermatitis, rosacea and psoriasis
- + Decreases recovery time
- + Decreases deeper lines and wrinkles
- + Stimulates ATP - cellular energy
- + Skin tightening
- + Increases skin's natural hydration
- + Wound Healing
- + Stimulates serotonin to the brain
