Product Description

What is Sculptra?

Sculptra is a long lasting semi permanent filler that stimulates your own natural collagen when it is injected. It is fantastic at mimicking the lost volume from bone and soft tissues that occur with ageing and it is great at giving the skin a "sculptra glow" to your skin. Overtime it is broken down by the body into carbon dioxide and water. It has decades of safety data and one of the most loved dermal fillers by many senior medical aesthetic injectors.

How many of Sculptra sessions will I need?

That depends on the concern you want to address. As a general rule if you are in your 60s you may need 6-8 phials delivered in 2 phials in 3 or 4 sessions 6-8 weeks apart. Those in their 30s may just need 2 or 3.

It is great for volumising and strengthening the skin in the temples, cheeks, jawline, marionettes and chin areas. It can't be used close to the eyes or in the lips nor can it be reversed like hyaluronic acid fillers, so choose your physician carefully.
