

Hyaluronic acid Pen 0.3ml 0.5ml

Our Product Introduction

Basic Information

- Brand Name: Hyaluron Pen
- Minimum Order Quantity: 1
- Price: 40 dollars
- Packaging Details: box
- Delivery Time: 1-3 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 5000 pcs/month

Product Specification

- Please Add: WhatsApp +86-18132165209

Product Description

Online Hyaluron Pen – No Needle Filler Course

The **Hyaluron Pen** is a non-invasive device that utilizes pressure to inject hyaluronic acid into the skin, offering a plumping effect to areas such as the lips and fine lines around the face. This technique has gained popularity as an alternative to traditional needle fillers due to its reduced pain, minimal downtime, and quick, effective results.

Why is it called 'Hyaluron Pen'?

Hyaluron: This refers to **hyaluronic acid**, the main substance used in the treatment. Hyaluronic acid is a naturally occurring compound in the skin that is responsible for retaining moisture, plumping the skin, and reducing the appearance of wrinkles. It is widely used in cosmetic treatments like dermal fillers for its ability to hydrate and smooth the skin. The hyaluron pen uses hyaluronic acid to enhance the skin's appearance by injecting it into the dermal layers.

Pen: The "pen" part of the name comes from the shape and design of the device, which resembles a pen. The hyaluron pen uses **high-pressure technology** to deliver the hyaluronic acid into the skin, much like how ink would be dispensed from a pen. However, instead of using a needle, the pen relies on pressure to push the hyaluronic acid through a very fine opening, creating a quick, controlled, and non-invasive delivery system.
