Product Description

Rotary Type Hyaluronic Acid Pen 0.3ml 0.5ml Restore Skin Elasticity With Ampoule

Water mesotherapy is to inject hyaluron into skin. Hyaluron contains moisture, 200-300 times as rich as one's body. So that it makes the skin smooth, soft, bright and hydrated after the injection. In order to keep the skin hydrated, ladies always choose varied skin care products. Actually, skin care products only hydrate moisture on the cutin. So that over smearing those products cannot deeply provide moisture for the skin. As we know, acne, wrinkle and inelasticity would appear if skin lacks moisture. Water mesotherapy will solves all the problems by reason of lacking moisture, such as sallowness, color spot, wrinkle... And it will supply moisture for dermis. Therefore water mesotherapy will works well on whitening, moisturizing and renewing inelasticity.

Our Product Introduction
