Product Description

Dermaplaning Kit Sterile Blades No 10 Stainless Steel 100 Pcs With Handle No 3 Suitable For Dermaplaning Facial

Product Description :

Dermaplaning is a skin exfoliating treatment that is usually performed on the face. In this procedure, dull layers of skin are removed from the face in order to reveal a brighter complexion. Although dermaplaning is a painless procedure, skin-care specialists' need to use sharp dermaplaning blades during the treatment.

Dermaplaning is a cosmetic procedure that removes the top layers of your skin. The procedure aims to remove fine wrinkles and deep acne scarring, as well as make the skin's surface look smooth. Dermaplaning is safe for most people, with little risk of side effects when it's performed by a certified dermatologist

Since this treatment works by removing dead skin cells, surface imperfections, and unwanted hair, it's best to get it done every three or four weeks
