## AQUALYX FAT DISSOLVER

Aqualyx fat dissolver is the first non-surgical treatment of local adiposity developed over 20 years ago. The aqueous compound solution within Aqualyx vials can be used to treat multiple areas around the body with stubborn fat pockets, Aqualyx can also be used to treat any small lipomas that appear on the face. The non-invasive treatment is now the preferred alternative to liposuction treatments.

Non-surgical and minimally invasive

Targets specific areas of stubborn fat

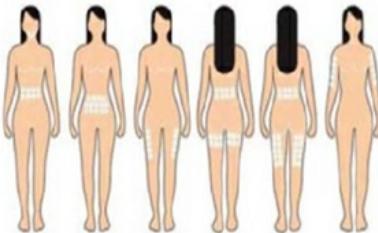

Result in a reduction of fat in the treated area

Improves the appearance of the skin

10 x 8ml vials of Aqualyx

Product Name	Aqualyx
Pack	10 vials in one box
Size	9 * 4 * 19cm
Weight	0.5kg
Raw material	purity 99.8% made in Germany
phosphatidylcholine	
Sodium deoxycholate	purity 98% made in Japan

### Application & Method

1. Shake ampule to mix PPC that is sunk at the bottom of ampule
2. Use 18G needle to extract PPC from ampule and use 27G needle to inject on the target area
3. Mark injection points on each target area with pen
4. Injection manuals according to each target area

Target areas	Injection points	Space between each point	Injection quantity / each point	Total ampules /target areas
Abdominal areas	About 125 points	1 cm	0.7~0.8cc	8~10 ampules
Fatty back	About 100 points			6~8 ampules
Black low in fat	About 75 points			4~6 ampules
Both forearms	About 38 points each both forearms			4~6 ampules
Both thighs	About 50 points each both forearms			6~8 ampules
Chin		0.5 cm	0.5cc	

#### 5. Injection intervals

(1)1 week-interval: You inject today, second injection is after a week.

(2)2 weeks-interval to repeat same target area injection.

You inject on Abdominal area today, second injection area is any other area except abdominal area after a week.

You can inject on Abdominal area AGAIN at Third injection.

So, injection interval of same target area is 2 weeks.

### Instruction For Use

#### Injection area:

Double chin, waist, arms, legs, belly

#### Depth of Injection:

3-5mm into fat layer. (Usually for 3-4mm deep for face, and 4-5mm deep for body.)

#### Way of injection:

It needs to be injected into the subcutaneous layer. The distance between each injection points should be around 10mm. Each injection point need 0.2-0.3ml for face, while 0.3-0.5ml for body.

#### Areas & Effects

- ✓ No treatment for bean allergy patients
- ✓ PPC, which is the main component of Lipd Lab, does not only treat subcutaneous fat, but also muscles nerves, and blood vessels
- ✓ Pigmentation or lump in the treatment area is healed naturally within 2-3 months
- ✓ Do not use in areas where there is a wound or eczema and dermatitis (This symptom is normal reaction of PPC, so you can take an analgesic heat medicine (Tylenol).
- ✓ Patients with heart, diabetes, cancer, stroke and arteriosclerosis
