- LipoLab PPC will be upgraded in 2018 and will be available in new product versions. With the combination of the best PPC ingredients and PLLA and PDRN, LipoLab products will reduce fat and, at the same time, increase the skin's own collagen production and elasticity, creating a resilient body line.

- + No pain
  - : By blocking substances that are transmitted to the nerves to relieve pain.
- + Rapid effect of lipolysis(Fast effects)
- + Prevents wrinkles and aging caused by the inclusion of ingredients PLLA and PDRN.
  - : It regenerates skin elasticity on the wrinkles that occur when the fat layer shrinks.

Perhaps you've never heard of treatment for weight loss?

Lipo lap ppc solution treatment offer many benefits towards weight loss.

How? Here's some ways these shots can help:

- + Reduces the storage of fat layer
- + Wrinkle improvement,
- Elasticity regeneration
- + Skin cell activation

**What is PPC?**

PPC(PhosphatidylCholine) spotlighted as the latest solution to obesity, is being called 'the 2ndbtx'.

No single case of side-effects has been reported in the clinical trial over 10,581 patients implemented

in the UK and has been made even more renowned since celebrities like Britney Spears and Mariah Carey look like this PPC treatment and it ended up with a success. It has now become very popular in over 60 countries.

#### Application & Method

1. Shake ampule to mix PPC that is sunk at the bottom of ampule
2. Use 18G needle to extract PPC from ampule and use 27G needle to inject on the target area
3. Mark injection points on each target area with pen
4. Injection manuals according to each target area

Target areas	Injection points	Space between each point	Injection quantity / each point	Total ampules / target areas
Abdominal areas	About 125 points			8-10 ampules
Fatty back	About 100 points			6-8 ampules
Back low in fat	About 75 points	1 cm	0.7-0.8cc	4-6 ampules
Both forearms	About 50 points each both forearms			4-6 ampules
Both thighs	About 50 points each both thighs			6-8 ampules
Chin		0.5 cm	0.5cc	

5 Injection intervals  
 (1) week-interval You inject today, second injection is after a week.  
 (2) 2 weeks-interval to repeat same target area injection.  
 You inject on Abdominal area today, second injection area is any other area except abdominal area after a week.  
 You can inject on Abdominal area AGAIN at Third injection.  
 So, injection interval of same target area is 2 weeks.

#### Instruction For Use

##### Injection area:

Double chin, waist, arms, legs, belly

##### Depth of Injection:

3-5mm into fat layer. (Usually for 3-4mm deep for face, and 4-5mm deep for body.)

##### Way of injection:

It needs to be injected into the subcutaneous layer. The distance between each injection points should be around 10mm. Each injection point need 0.2-0.3ml for face, while 0.3-0.5ml for body.

#### Areas & Effects

- ✓ No ingredient for bean allergy patients
- ✓ PPC, which is a component of Lipofab, does not only treat subcutaneous fat, but also muscles, nerves, and blood vessels.
- ✓ Pigmentation or lump in the treated area is treated naturally within 2-3 months.
- ✓ Do not inject PPC where there is a wound or eczema and dermatitis (This symptom is normal reaction of PPC, so you can take an analgesic heat medicine (Tylenol).
- ✓ Patients with heart, diabetes, cancer, stroke and arteriosclerosis
