### Product Description

MAXY FILL:

Our

MAXY FILL is a special filler made with Hyaluronic acid that is used to improve the appearance of your skin. It's great for shaping your body, filling in wrinkles, and smoothing out deep lines in your skin. We use it by injecting it just beneath your skin.

One of the cool things about MAXY FILL is that if you don't like the results or experience any issues after the injection, it can be completely removed with a special enzyme called hyaluronidase. This is because MAXY FILL is designed to resist your body's natural enzymes.

Benefits of MAXY FILL:

- MAXY FILL stays right where it's injected, thanks to its perfect thickness and stickiness.
- The procedure is easy and doesn't require anesthesia, and its effects last a long time.
- We make MAXY FILL using the latest advanced methods, ensuring top quality and purity.
- After the injection, the marks left behind are hardly noticeable.

Safety:

- There are no harmful chemicals left behind after using MAXY FILL.
- We closely check for any impurities and bacteria.
- We use only the best materials approved by the FDA and EDQM.
- MAXY FILL can be easily removed if needed, and it won't harm your skin.

Cautions:

- If you notice redness, swelling, or itching after using MAXY FILL, or if these symptoms appear in direct sunlight, see a dermatologist right away.
- Don't use it on areas with scars, eczema, or skin irritation.

Specifications:

- Ingredients: Hyaluronic acid, Lido (a numbing agent)
- Hyaluronic Acid Concentration: 20mg/ml
- Particle Size: Very tiny, around 1,000 to 1,200 micrometres
