Product Description

The picosecond laser pen is manufactured by high quality ABS and electronic component. Blue LED light, it has four gears of energy intensity and nine gears of working frequency. Its pulse width is short, it hardly produces light and heat effect, no damage to the undamaged tissue. It can directly break up dark pigment by powerful and rapid energy to achieve the goal of improving skin.

With none harm or damage to skin tissue. It will ensure fewer treatment times and better treatment effects, more safe to apply.

Features:

1. Short pulse width, hardly produce light and heat effect.
2. Powerful and rapid energy breaks up dark pigment directly.
3. Without any damage to skin tissue.
4. Fewer treatment times, better treatment effects.
5. Wide customer application range, more durable and safe.
