### MICRO CURRENT SKIN MASSAGER

Solve skin problems, Regain your elegance

A diagram of the Micro Current Skin Massager against a blue background. The device is shown in the center, standing in its base. Surrounding the device are seven circular icons, each representing a different feature: 'Micro current', 'Heat to massage', 'Ion lead-in', 'Multiple functions', 'Vibration massaging', 'LED red light', and a power button icon.

Microcurrent stimulation delivers tiny electrical impulses that mirror the body's own natural bio electrical field. In most cases, treatment is virtually sub-sensory, with just a slight electrical tingling sensation.

Microcurrent impulses will lift and tone the facial muscles and the neck area, whilst improving skin elasticity and reducing the appearance of fine lines and wrinkles. This gives a more youthful, fresh appearance and glow.

#### **Microcurrent+LED red light+Vibration massaging+Heat to massage+Ion lead-in**

1. The micro current can stimulate skin to contract, balance man's bio electric field, refine skin and enhance skin self-repairing capability.
2. 42°C smart temp control, extend and massage skin.

- 3. The positive and negative ion can alternately electrolyze skin care products nutrition, making it easier for skin to absorb and infill the skin with caring energy.
- 4. The red light has a wave length of 630mm which is effective to massage and awake skin.
- 5. Specially designed for face and body massaging, effective to smoothen sagging skin.
