Name	kabelline Slimming Solution Injection Lipo Lab

LIPO LAB is a product for melting subcutaneous fat. LIPO LAB is safe and effective. The treatment of subcutaneous fat with LIPO LAB PPC is done at 10-day interval. Lipo Lab has been developed in order to care the body more easily and quickly by selecting raw materials made in Germany which is known for safety, effectiveness and the best purity of 99.8%.

Lipo Lab was designed in order to solve a problem in package due to the product's going bad and to save trouble to keep it refrigerated when storing the products by performing aseptic processing under 1,000 of atmospheric pressure of higher and gamma sterilization, and to be used conveniently and safely by thoroughly blocking infection by virus.

Product Name	lipo Lab
Pack	10 vials in one box
Size	9 * 7 * 19cm
Weight	0.5kg
Raw material phosphatidylcholine	purity 99.8% made in Germany
Sodium deoxycholate	purity 98% made in Japan

Application & Method

1. Shake ampule to mix PPC that is sunk at the bottom of ampule
2. Use 18G needle to extract PPC from ampule and use 27G needle to inject on the target area
3. Mark injection points on each target area with pen
4. Injection manuals according to each target area

Target areas	Injection points	Space between each point	Injection quantity / each point	Total ampules /target areas
Abdomonal areas	About 125 points	1 cm	0.7~0.8cc	8~10 ampules
Fatty back	About 100 points			6~8 ampules
Black low in fat	About 75 points			4~6 ampules
Both forearms	About 38 points each both forearms			4~6 ampules
Both thighs	About 50 points each both forearms			6~8 ampules
Chin		0.5 cm	0.5cc	

5. Injection intervals

(1) 1 week-interval: You inject today, second injection is after a week.

(2) 2 weeks-interval to repeat same target area injection.

You inject on Abdominal area today, second injection area is any other area except abdominal area after a week.

You can inject on Abdominal area AGAIN at Third injection.

So, injection interval of same target area is 2 weeks.

Instruction For Use

Injection area:

Double chin, waist, arms, legs, belly

Depth of Injection:

3-5mm into fat layer. (Usually for 3-4mm deep for face, and 4-5mm deep for body.)

Way of injection:

It needs to be injected into the subcutaneous layer. The distance between each injection points should be around 10mm. Each injection point need 0.2-0.3ml for face, while 0.3-0.5ml for body.

Areas & Effects

Double Chin

Armpit, upper arm

Back

Abdomen, side
(Love handle)

Thighs

Face

- ✓ No treatment for bean allergy patients
- ✓ PPC, which is the main component of Lipd Lab, does not only treat subcutaneous fat, but also muscles nerves, and blood vessels
- ✓ Pigmentation or lump in the treatment area is healed naturally within 2-3 months
- ✓ Do not use in areas where there is a wound or eczema and dermatitis (This symptom is normal reaction of PPC, so you can take an analgesic heat medicine (Tylenol).
- ✓ Patients with heart, diabetes, cancer, stroke and arteriosclerosis
