## Product Description

### Rejuran Injection Remove Acne Pdrn Contain DNA Dermal Filler Rejuran Pn Rejuran

Rejuran is an injectable "skin healer" made from salmon DNA (polynucleotides). Unlike traditional dermal fillers that add immediate volume, It repairs damaged skin cells and stimulates your body's natural collagen production to improve texture, elasticity, and hydration over time. How It Works Cellular Repair: Polydeoxyribonucleotide (PDRN) acts on the dermis to heal skin and reduce inflammation from the inside out. Volume vs. Texture: While HA (hyaluronic acid) fillers physically fill wrinkles with a gel, Rejuran thickens the skin itself for a natural, healthy glow. Popular Rejuran Formulas Rejuran Healer: The classic formula for overall face rejuvenation, improving fine lines, pores, and skin barrier. Rejuran I: Formulated specifically for the delicate under-eye area to minimize swelling and reduce dark circles and creepiness. Rejuran S: A thicker, more viscous gel meant to "fill" and heal atrophic acne scars and deep indentations.
