What is Filorga 135?

Filorga 135 is a hyaluronic acid treatment intended for revitalizing mesotherapy, biological rejuvenation and hydration of aging skin, and flattening of superficial wrinkles. Mesotherapy can be carried out manually using the provided 30G needles, or via an injector gun. Filorga 135 is indicated for injection into the dermal-epidermal connective tissues, as well as the superficial dermal layers of the face, neck, decolletage, wrists, inner thighs, and periorbital zones.

Where can I buy this product?

If you want to offer your patients revitalizing mesotherapy, you can buy Filorga 135 online from MedicaDepot.com. If you prefer, you can also order wholesale Filorga 135 by phone from Medica Depot's helpful customer care associates. Purchase Filorga 135 today to help your patients revitalize and rejuvenate their aging and photodamaged skin.

How does this product work?

Like other mesotherapy injectables, the main ingredient in Filorga 135 is hyaluronic acid, in a concentration of 0.025mg/ml. This naturally occurring substance adds hydration to the skin and promotes collagen regeneration, smoothing out fine lines and rough texture. However, unlike other mesotherapy injectables, Filorga 135 contains 53 additional ingredients to treat aging and photodamaged skin. These include 23 amino

acids to encourage the production of collagen and elastin, 6 coenzymes to catalyze bio-chemical reactions in the tissues, 5 nucleic acid bases to activate cellular communication, 12 vitamins including A, B, C, and E to stimulate vital cell functions, 6 minerals to prevent and correct skin deficiencies, and 2 antioxidant to capture free radicals and prevent them from damaging the skin.

What are the ingredients?

Filorga 135 contains 0.025mg/ml of sodium hyaluronate, as well as a polyrevitalizing solution.

How to inject this product

Because this is a medical procedure, only licensed healthcare professionals may perform Filorga 135 injections. This mesotherapy treatment may be administered via the nappage or serial puncture injection techniques. Filorga 135 is injected into the dermal-epidermal junction or the superficial dermis using a 30G or 32G needle or a mesotherapy gun. For full instructions for use, please consult the provided product leaflet.

When should I use this product?

Filorga 135 should be used on patients seeking the rejuvenation or hydration of their skin.

What areas can I treat with this product?

You can inject Filorga 135 into your patient's face, neck and decolletage, the backs of their hands, the insides of their arms and legs, and their abdomen. Wherever you use Filorga 135, you'll improve hydration and texture for brighter, firmer-looking, more youthful skin.

How long do results last?

It will take a minimum of 5 Filorga 135 treatment sessions for your patient to notice an improvement in their skin. You should give your patient 3 Filorga 135 treatment sessions spaced out by 15 days, followed by 2 Filorga 135 treatments spaced out by 1 month. Your patient should return every 3 months for another Filorga 135 treatment to maintain their beautiful results.

After the recommended course of treatment is completed, your patients will notice a clear improvement in the condition of their dermis, with noticeably younger looking skin that is more hydrated and radiant. The longevity of these effects varies by individual, but on average these results are expected to last up to 3 months.
