Basic Information

- Place of Origin: Korea
- Brand Name: Vom filler
- Certification: CE
- Model Number: VOM
- Minimum Order Quantity: 1 piece
- Price: \$30 - \$38
- Packaging Details: box
- Delivery Time: 1-3 days
- Payment Terms: Creadit-card/TT/Western Unio/
PaypalBitcoin(BTC)/USDT/XTransfer
- Supply Ability: 100000000000 bottles /days

Product Specification

- Product Name: Hyaluronic Acid Dermal Filler
- Effects: Face Nose Lips Breast Buttock Body Chin Filler
- Feature: Deep Wrinkles Filler Remove
- Material: Hyaluronic Acid
- Usage: Injection Wrinkles Remove
- Used For: Beauty Clinic
- Size 2: 1ml X 2
- Type: Cross Link Ha Filler

Product Description

Vom Ha Filler Dermal Filler Skin Reduce Wrinkles Facial Hyaluronic Acid 2 Syringes Dermal Fillers Chaeum Vom Cross-Linked Hyaluronic Acid Vom

Specifications:

product name	hyaluronic acid dermal filler
effect	wrinkles wrinkles remove
usage	for beauty clinic
size	1ml
type	fine erm deep ultra - deep
usage	face lips nose breast buttocks facial
feature	anti aging anti wrinkles

Advantages

Vom is a range of injectable fillers produced by CG Bio Co., Ltd, which uses hyaluronic acid to correct wrinkles with varying degrees of visibility. The series consists of three fillers, VOM Light, VOM Intensive, and VOM Volume, suitable for the elimination of fine, deep, and severe age-related skin changes. All the products contain a unique multiphase solution that comprises cross-linked polymeric forms of hyaluronic acid. This formula provides the optimal viscosity and stability of the product, which enables the correction of wrinkles with any degree of complexity, depending on the type of injections.

Main Ingredients:

HA(hyaluronic acid): 20mg/ml with lido 0.3%

Packing Unit :

2 x 1ml prefilled syringe
2 x needles

VOM Light:

VOM Light is an injectable filler made of cross-linked polymeric hyaluronic acid suitable for correction of fine lines in the eye, lips, and neck areas. This product has a unique multiphase formula that provides optimal viscosity and stability, preventing migration from the injection site. The manufacturing technology increases the stability of hyaluronic acid in the composition, resulting in a long-lasting effect from the procedures.

Application Areas:

- Elimination of fine lines
- Flattering of marionette lines and "crow's feet" wrinkles
- Correction of fine lines in the neck area
- Elimination of light wrinkles in the lips area

VOM Intensive:

VOM Intensive is an injectable filler made of hyaluronic acid suitable for the correction of wrinkles with a middle degree of evidence. Its unique multiphase formula, manufactured by R2 technology, provides optimal viscosity and density. This filler can resolve various cosmetological goals, including the correction of nasolabial folds, lips augmentation, non-surgical correction of

nose shape, and wrinkles in the forehead area. The presence of lodo in the composition makes the procedures almost painless, and the effect from the procedures lasts for a long time.

Application Areas:

- Correction of middle degree wrinkles
- Flattering of wrinkles in the forehead area
- Correction of nasolabial folds
- Correction of shape of nose headboard
- Lips augmentation

VOM Volume:

VOM Volume is an injectable filler made of polymeric hyaluronic acid suitable for the elimination of deep wrinkles and non-surgical correction of face shape. This product is injected deeply into the muscular layer to correct even profound wrinkles and folds. Its unique multiphase formula provides high density and viscosity, which does not migrate from the injection area, effectively restoring volumes and non-invasively correcting face shape. The presence of lodo in the composition makes the procedures almost painless, and the polymeric hyaluronic acid provides a long-lasting effect, skin moisturizing, and flattering of its surface.

Application Areas:

- Elimination of very deep wrinkles
- Restoration of volumes in the cheeks and temporal areas
- Non surgical correction of face shape
- Deep working out of wrinkles in the forehead area

Hyaluronic acid fillers

Hyaluronic acid forms an part of the natural extracellular matrix which is found in high amounts in several connective tissues including the skin, the vitreous humor of the eye and the synovial fluid . Chemically, HA is a linear polysaccharide composed of repeating disaccharide units of glucuronic acid and N-acetylglucosamine . HA is considered to be the most popular dermal filler to replace volume loss due to normal aging for several reasons including: its hygroscopic property, biocompatibility and reversibility. Over the past several decades, various forms of HA fillers have been developed and they differ in many aspects including: the type and degree of crosslinking, gel viscosity, gel hardness, gel consistency, extrusion force, total HA concentration and duration of presence in the skin.

Used For?

Hyaluronic acid fillers are quite versatile and can be effectively used to achieve different goals in various areas of the face and body.

One well-known application is adding volume to the cheek and lips for greater fullness; fillers can also contour and define the jawline.

These fillers can fill in and smooth wrinkles and lines in the face, including frown lines, deep forehead lines, smile lines, crow's feet around the eyes, nasolabial folds and in the chin facial , lips , nose area.

Some fillers can also address loss remove anti and wrinkles in the earlobes, and volume loss in the back of the hands. Lastly, they can fill in depressed scars and depressions in the skin under the eyes and in the cheeks.
